HOMEGROWN VIOLENT EXTREMIST MOBILIZATION INDICATORS

The indicators of violent extremist mobilization described herein are observable behaviors that could help determine whether individuals or groups are preparing to engage in violent extremist activities, such as conducting an attack or traveling overseas to join a foreign terrorist organization. Indicators are grouped by diagnosticity—meaning how clearly we assess the behavior demonstrates an individual’s likelihood of engaging in terrorist activity.

The National Counterterrorism Center (NCTC), the Federal Bureau of Investigation (FBI), and the Department of Homeland Security (DHS) emphasize that many of the indicators described herein may involve constitutionally protected activities and might be insignificant on their own. However, when observed in combination with other suspicious behaviors, these indicators may raise suspicion in a reasonable person and constitute a basis for reporting. Law enforcement action should not be taken solely based on the exercise of constitutionally protected rights, or on the apparent or actual race, ethnicity, national origin or religion of the subject, or on any combination of these factors. Individuals are encouraged to contact law enforcement if, based on these indicators and the situational context, they suspect an individual is mobilizing to violence.

WHY WAS THIS BOOKLET CREATED?

The United States and other Western nations face a heightened threat from homegrown violent extremists (HVEs) heeding the call to violence from foreign terrorist organizations, including the Islamic State of Iraq and ash-Sham (ISIS), al-Qa’ida, and other groups. In an effort to mitigate future attacks, the initial list of indicators was developed based on a review of information derived from dozens of FBI terrorism investigations, peer-reviewed academic studies, and brainstorming sessions by experts from the Intelligence Community and law enforcement. The indicators are continuously updated based on input from subject matter experts.

The booklet was initially published in 2015, with an updated version published in January 2017. An unclassified version was released in December 2017.

MOBILIZATION INDICATOR CRITERIA

The booklet describes each indicator in terms of four criteria: diagnosticity, category of behavior, observable (by), and time sensitivity.

DIAGNOSTICITY - The extent to which the behavior demonstrates mobilization to violence

GROUP A: **Highly** diagnostic on their own

GROUP B: **Moderately** diagnostic on their own; require one or more other indicators to gain diagnosticity

GROUP C: **Minimally** diagnostic on their own; require several other indicators to gain diagnosticity

CATEGORY OF BEHAVIOR - The type of behavior the indicator typically represents

Preparation: Developing and displaying a readiness to commit a violent act

Motivation: Developing and displaying a mindset oriented toward committing a violent act

Concealment: Hiding violent act-related activities from scrutiny

OBSERVABLE - The people who are most likely to see these activities

TIME SENSITIVITY - The typical amount of time between the occurrence of the behavior and the violent act; these timelines are generalized guidelines and individual cases vary as other factors accelerate and decelerate mobilization

Imminent Concern: Days/hours before violent act

Near-Term Concern: Weeks before violent act

Long-Term Concern: Months or years before violent act

RISK FACTORS

It is important to consider the totality of circumstances when observing potential indicators, as some factors may increase the risk of extremist violence in a given situation. These factors may include but are not limited to:

- Inability to cope with changes or perceived failures in relationships, school, or career
- History of violence (e.g., domestic violence or violence toward animals) and unstable mental state
- Social isolation or inability to join with or relate to others
- Possession of, access to, or familiarity with weapons or explosives

FREQUENTLY ASKED QUESTIONS

WHAT IS A HOMEGROWN VIOLENT EXTREMIST?

A homegrown violent extremist (HVE) is a person of any citizenship who lives or operates primarily in the United States or its territories, and who advocates, engages in, or is preparing to engage in or support terrorist activities in furtherance of a foreign terrorist organization's objectives, but who is acting independently of foreign terrorist direction. Because HVEs are acting to further the goals of a foreign terrorist organization, they are considered foreign intelligence threats under the authorities of the Intelligence Community and domestic public safety entities.

CAN THESE INDICATORS BE APPLIED TO INDIVIDUALS OTHER THAN HOMEGROWN VIOLENT EXTREMISTS?

Certainly, behaviors exist and are noted in this booklet that would be troubling regardless of ideological motivation and may warrant contacting law enforcement. However, this booklet is focused on individuals or groups that are inspired or enabled by foreign terrorist organizations, including but not limited to ISIS, al-Qa'ida, and their affiliates and allies.

WHY CAN'T LAW ENFORCEMENT DO ALL OF THIS ITSELF; WHY INVOLVE THE GENERAL PUBLIC?

We are all in this together. We continue to see that members of the community—such as family members and peers—are often best positioned to witness signs of mobilization to violence. Such community members almost always are the first to detect hints that an individual may be considering violent action in the Homeland or overseas.
